WARNING: Not To Be Used for Personnel **Protection**

Never use this device as a sensing device for personnel **protection**. Doing so could lead to serious injury or death. This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition.

EZ-LIGHT Application Notes

Push-button models: When power is initially applied to the device, press the **button** to turn the light on. If power to the device is interrupted the light will turn off and will remain off when power is restored. To turn the light back on, press the button.

Terminal-wired models: Cover screws must be tightened and use water tight compression fitting to meet environmental ratings.

¹ Integral 4-pin M12/Euro-style quick disconnect models are listed. AC models are terminal-wired only.

• To order a terminal-wired model, omit the suffix Q in the model number. For example, SP150GP.

• To order the 150 mm (6 in) PVC cable model with a 4-pin M12/Euro-style quick disconnect, replace the suffix "Q" with "QP" in the model number. For example, SP150GPQP.

• Models with a quick disconnect require a mating cordset.

² 1-Color Models: 18 LEDs per color; 3-Color Models: 6 LEDs per color. Contact Banner Engineering for other colors and color combinations.
