

pneumatic push-to-connect fittings system LF3000®

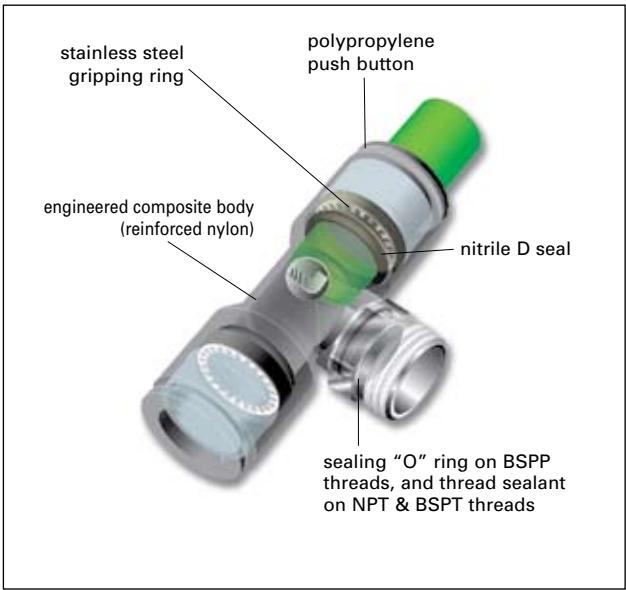

Principle of system LF3000®

technical specifications

Reliable performance is dependent upon the tube being used, ambient temperature and fluid conveyed together with the component materials of the fitting.

All items in the LF3000® range are guaranteed SILICONE FREE

Invented and launched by **Legris** in 1969, the **LF3000® system** has become universally adopted. It has been designed using a simple and widely proven operating principle which allows instant connection. The **connection** of tube to fitting is made by simply pushing the tube into the fitting, no other operation is required. **Disconnection** is similarly "**instantaneous**". Attentive to market needs, **Legris** has taken into account the requirements of its customers, i.e. optimization of performance, miniaturization, and appearance. In order to be utilized to its maximum capability, the **LF3000® system** is available in 3 ranges:

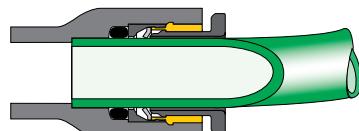

- for fractional **inch tubes** with **NPT threads**.
- for fractional **inch tubes** with **BSP threads in taper form**.
- for **metric tubes** with **BSP threads in taper, parallel or metric form**.

Millions of fittings are in service throughout the world. Designed for pneumatic installations, the **LF3000® system** is therefore an essential component in a wide variety of industries.

performance and reliability

- full flow:** as gripping and sealing within the fitting is achieved using the outside of the tube without deformation, there is no flow restriction. Smallest orifice inside the fitting is = or > than the ID of the tube.
- automatic sealing:** the D seal within the fitting provides a positive seal on the O.D. of the tube, in both static and dynamic positions, due to an **optimized design** of the fitting cavity.
- internal hex:** allows ease of assembly in tight places.

immediate seal of threads

- for **tapered threaded fittings**, due to pre-applied teflon thread sealant.
- for **parallel threaded fittings**, due to a patented built in captive "O" ring seal.

one of the most extensive ranges on the market

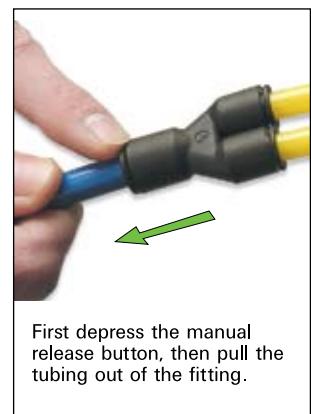

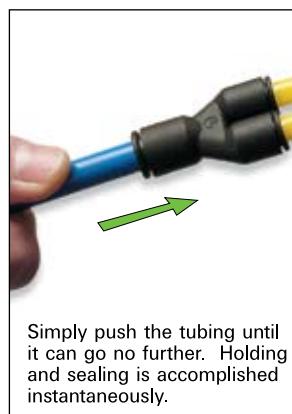

- a solution for all applications:** wide variety of body designs and numerous configurations, from 1/8" to 1/2" and 3mm to 14mm diameters.
- types of thread:** NPT, BSP taper, BSP parallel and metric.
- special items:** on request.

compact and aesthetic

- optimized dimensions and new body designs, to satisfy the **ergonomics** and **aesthetics** of **pneumatic installations**.

orientable at base

- ease of assembly
- no over/under torquing

instant connection & disconnection

- instant** connection and disconnection without the use of tools.
- time saving.
- 1 piece fitting.
- reusable
- release caps:** available in 6 colors, to **identify** different circuits. Fittings come standard with a black push button.

Our production process includes individual unit quality control and dating, for all LF3000® push-to-connect fittings, in order to guarantee their quality and traceability.

You can find LF3000® push-to-connect fittings on legris.com

online catalog

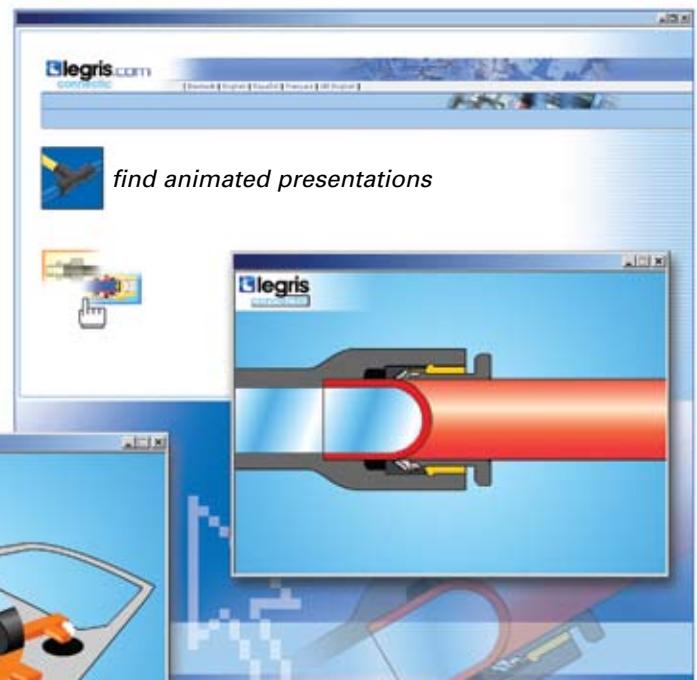

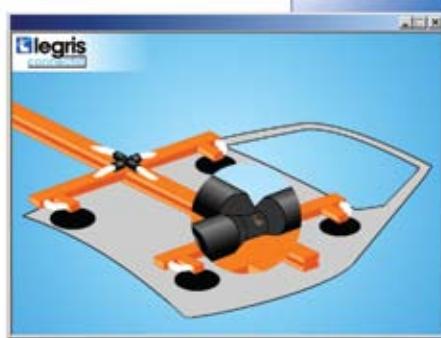

- with the **online catalog**, regularly updated, you can easily find the whole range of **LF3000®** for inch and metric tubing.
- you can find a product quickly with 3 search options.
- you can get a complete product datasheet with a photo, technical drawing and specifications
- you can ask for a quotation from our distributors
- you can download CAD drawings for free

training module

- with the **training module** designed to optimize performance of your installations, you will find **animated presentations** of LF3000® fittings and their functions.
- instant connection and disconnection
- applications and solutions to match your equipment requirements

Discover Complimentary Legris Products:

As the inventor of the push-to-connect fitting, Legris continues to develop product and application solutions. Today's product offering is the result of years of innovation, development and focus on customer needs. To compliment its line of fittings, Legris also offers the products below.

Multi-Connector

inch and metric OD with 7 or 12 tube outlets

- For ease of installation, each tube outlet is numbered
- location pin prevents assembly errors
- cap helps guide the tubes and protects connections

Mini Ball Valves

inch and metric OD - NPT and BSPP

- 3 types of mounting provide suitable options for every application
- screwdriver slot allows opening and closing when access is difficult

Stainless Steel Flow Control

inch OD - NPT

- all stainless steel construction offers excellent resistance to aggressive environments & fluids
- suitable for many industries - chemical, food, packaging, medical & wash-down applications

Stainless Steel Check Valves

NPT and BSPP

- allows air to pass in one direction while blocking flow in the other direction
- all stainless steel construction offers excellent resistance to aggressive environments and fluids

Quick Exhaust Valves

NPT

- increases system efficiency & the speed of a cylinder
- purges cylinder exhaust air at the cylinder port rather than the control valve

Lockable Slide Valves

NPT

- used for immediate isolation of the air line by venting the system to atmosphere
- safety feature - can be padlocked to prevent unintended operation

Stainless Steel Silencers

NPT and BSPP

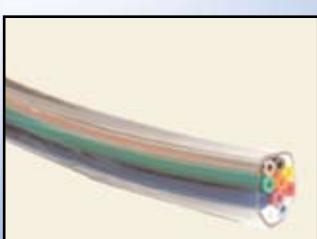

- reduces equipment noise
- all stainless steel construction offers excellent resistance to aggressive environments & fluids

Safety Blowgun

1/4" NPT

- conforms to OSHA standards 1910.242 and 1910.95
- available with nickel-plated body and black powder coated body

Multi-Bundled Tubing

*Inch in polyurethane
Metric in nylon*

- perfect tubing for multi-connectors
- excellent solution to neatly color code a pneumatic system

Tube Cutter

- makes a square cut every time
- for tubing and hoses up to 1"
- spare blades available

Available in the widest range of fractional inch and metric sizes, Legris has designed products specifically for food, safety, medical, packaging, and automotive industries.
