WARNING

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.
 This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met. The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

SALE CONDITIONS

The items described in this document are available for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any sale contract entered into by Parker will be governed by the provisions stated in Parker's standard terms and conditions of sale (copy available upon request).

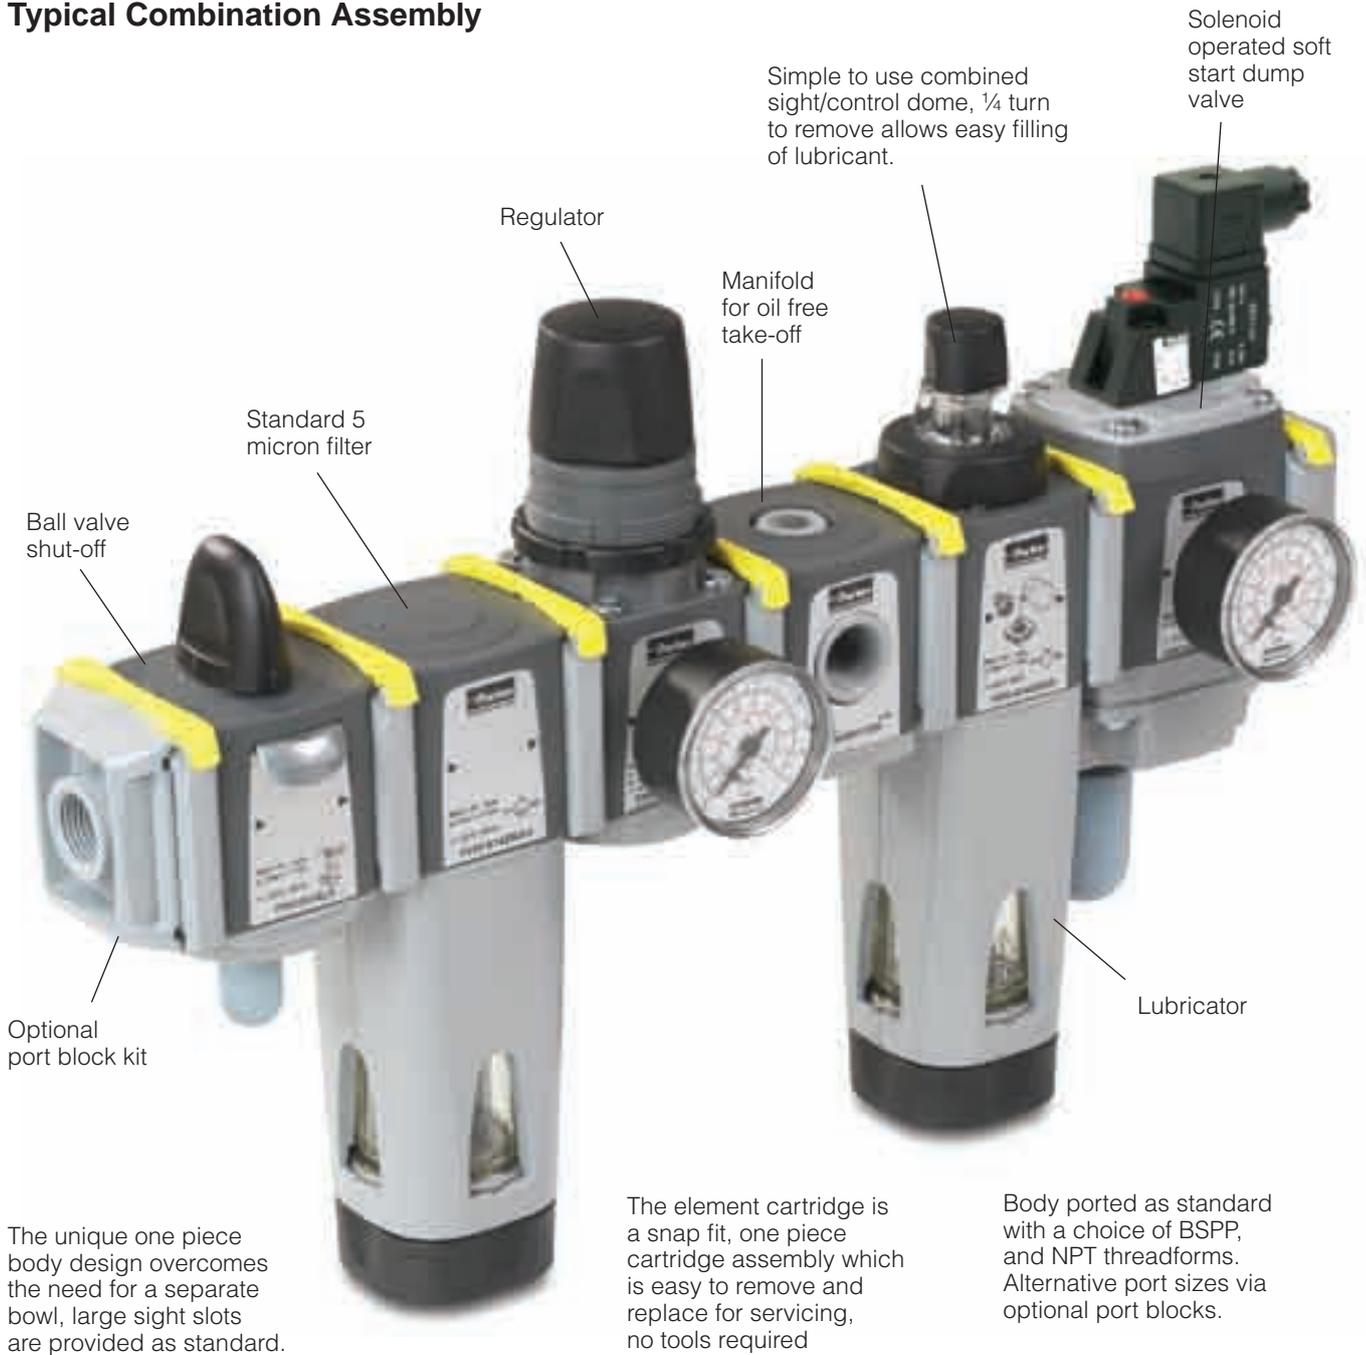

Moduflex modular air preparation system

The Moduflex modular air preparation system is constructed out of aluminium for the added advantages of both lightweight and strength.

The unique 'Cliplok' fastener enables combinations of units to be built in a fraction of the time taken by more traditional systems.

Combinations may be assembled quickly and easily, the individual units combine face to face with no intermediate block and No increase in overall dimension.

Typical Combination Assembly

The unique one piece body design overcomes the need for a separate bowl, large sight slots are provided as standard.

The element cartridge is a snap fit, one piece cartridge assembly which is easy to remove and replace for servicing, no tools required

Body ported as standard with a choice of BSPP, and NPT threadforms. Alternative port sizes via optional port blocks.

Manual, semi-automatic and fully automatic drain options are available, recessed into the base plate for extra safety & protection from damage.

Moduflex modular air preparation system

Cliplok Mounting System

The unique 'Cliplok' allows units to be connected together, without the use of pipe connectors, saving space whilst providing constant mounting centres. The 'Cliploks' slide into the units from the front and rear and are locked in place by the overstrap.

For wall mounting 'Cliploks' with integral wall brackets are available. They are assembled and locked in exactly the same way.

Wall mounted 'Cliploks' can be left attached to the wall and the unit will slide off, once the overstrap has been lifted.

'Cliploks' locate and fix units in combination, allowing easy removal for servicing with no width penalty.

Moduflex modular air preparation system

Moduflex Series Filter Elements

Moduflex Series standard Filter units feature 5 micron elements as standard with a 40 micron option.

Options include Coalescing units for the removal of oil and water aerosols and Adsorber units with activated carbon elements for the removal of hydrocarbon vapours.

The unique one piece body design overcomes the need for a separate bowl. Featuring an easy to use 1/8 turn base plate for filter element removal with positive latch to ensure correct and safe refitting.

The element cartridge is a snap fit, one piece cartridge assembly which is easy to remove and replace for servicing, no tools required.

Manual, semi-auto and automatic drain options are available.

ATEX approval: CE Ex II 3 GD
Safety norms: ISO 4414
EN 983

One hand operation for easy servicing, no small easily lost part to worry about.

Body ported as standard with a choice of BSPP, BSPT and NPT threadforms

Large sights provided as standard

Standard filter units feature 5 micron element.

Condensate bowl

Validated for transport applications

**RAILWAY INDUSTRY
ASSOCIATION**

BS EN / IEC 61373:1999, Category 1, Class B.

As you would expect from a member of the Rail Industry Association, the Moduflex60 FRL meets the test specification standards enabling the Moduflex60 FRL to be used as a validated product in a variety of rail applications.

Moduflex modular air preparation system

Easy to use large diameter oil filling orifice

Simple to use combined sight/control dome, 1/4 turn to remove allows easy filling of lubricant even under pressure.

Optional Tamperproof Kit

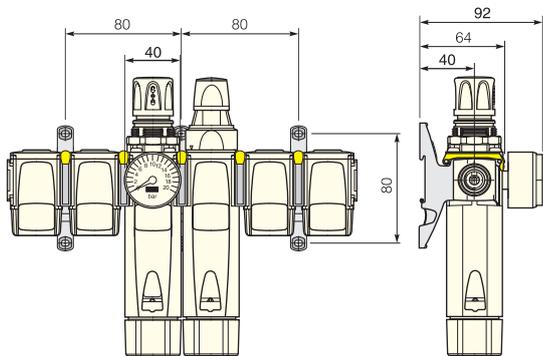

Optional Manifold Mounted Regulators

An optional version of the regulator may be Manifold Mounted for common inlet installations, providing any number of subsidiary p2 pressures.

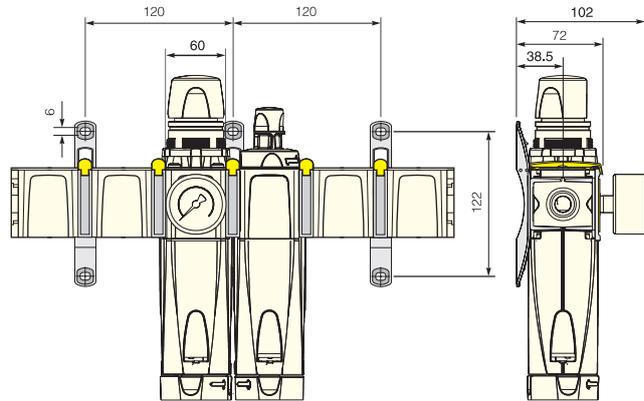

Moduflex modular air preparation system

Recommended Wall Mounting Configurations

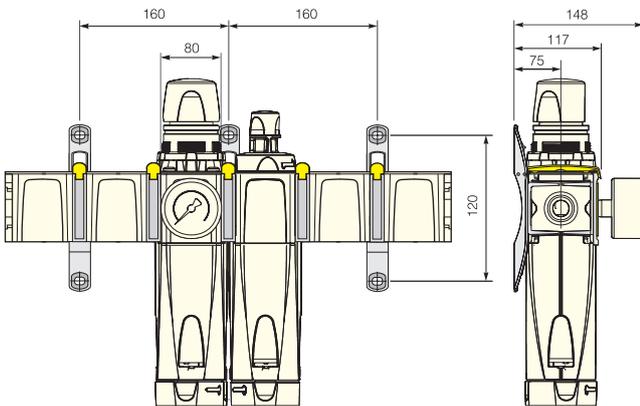

Moduflex 40 P3H Series

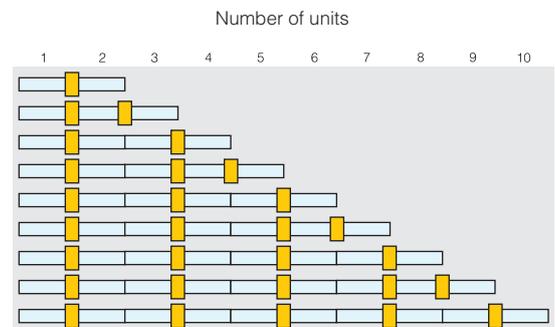

Moduflex 60 P3K Series

Moduflex 80 P3M Series

Position of Wall Mounting Bracket for Combinations

Single Mounting Bracket

Facilitates the permanent mounting of a single unit without the use of the 'Cliplok' system. The single piece steel bracket may be fixed to the wall or machine and a single Moduflex unit simply and securely pushed into place.

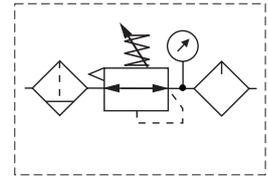

This is a permanent mounting option, care must be exercised before the unit is assembled.

Suitable for individual Filter and Lubricator mounting.

For all other mounting arrangements the 'Clipok' system should be used.

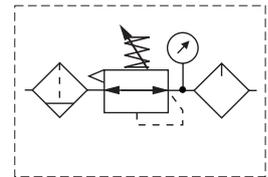

Series	Description	Weight g	Order Code
P3H	Single unit mounting bracket	29	P3HKA00MW
P3K	Single unit mounting bracket	44	P3KKA00MW
P3M	Single unit mounting bracket	130	P3MKA00MW

* flow with 6,3 bar inlet pressure and 0,5 pressure drop.

Technical Information

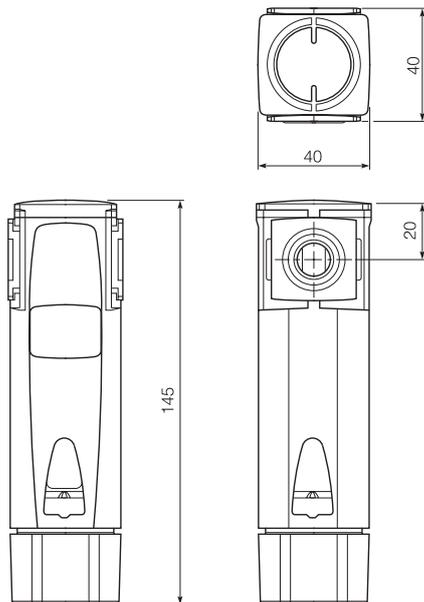

Fluid:	Compressed air
Maximum inlet pressure*:	17 bar Manual or Semi auto
Temperature range*:	-20°C to +80°C
Particle removal:	5 micron
Air quality:	Within ISO 8573-1, Class 3 and 5 (particulates)
Typical flow with 5µm element 6,3 bar inlet pressure and 0.5 bar pressure drop:	18 l/s
Manual drain:	twist grip open and barbed connection
Semi-auto drain: 0,2 bar @ min flow of 0,4 l/s bowl pressure to close drain	with barbed connection
Bowl sump capacity:	10 cm ³

* Air supply must be dry enough to avoid ice formation at temperatures below +2°C

Material Specification

Coalescing Filters and Adsorbers

- Integral 1/8 or 1/4 ports (BSPP & NPT)
- Removes liquid aerosols and sub micron particles
- Oil free air for critical applications, such as air gauging, pneumatic instrumentation and control
- 0.01µm element as standard (coalescer)
- Differential Pressure Indicator (DPI) as standard on Coalescing Filters
- One hand operation for easy element cartridge removal
- Positive bayonet latch to ensure correct & safe fitting
- No tools required for servicing
- Adsorbing activated carbon element removes oil vapours and most hydrocarbons

Note: To optimise the life of coalescing element, it is advisable to install a P3HFA pre-filter with a 5 micron element upstream of the coalescing filter.

Coalescing element:	Borosilicate & felt glass fibres
Adsorber element:	Activated charcoal
Elastomers:	Nitrile NBR
Bayonet support:	Nylon
Drain:	Acetal
Differential pressure indicator materials:	
Body:	Technopolymer
Internal parts:	Acetal
Spring:	Stainless steel
Elastomers:	Nitrile NBR
Support plate	Aluminium
Screws	Steel / zinc plated

Flow characteristics

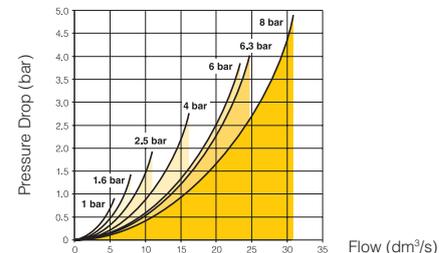

(1/8) 0.01µm Coalescing Filter

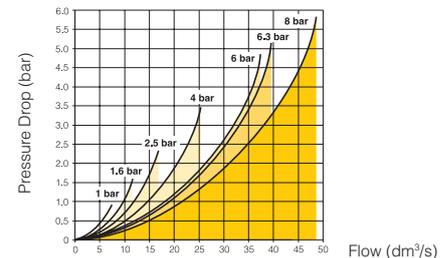

(1/4) 0.01µm Coalescing Filter

1/8) Adsorber Filter

(1/4) Adsorber Filter

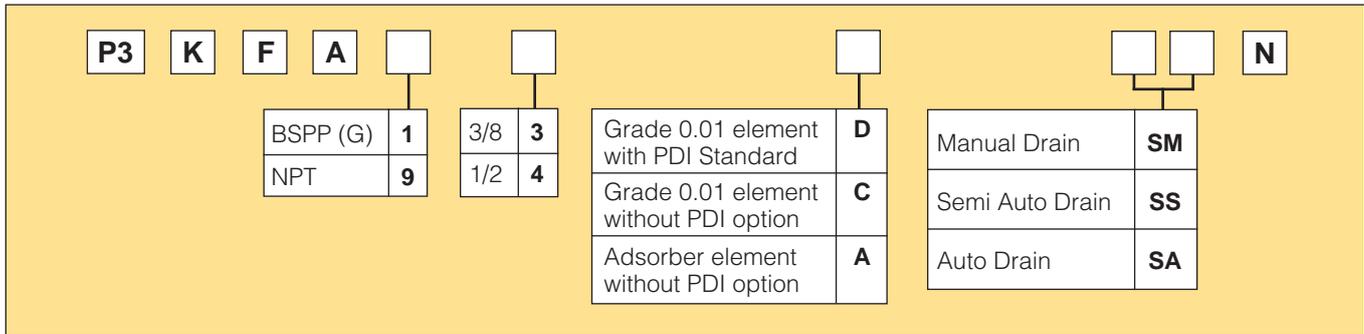

Coalescing Filters and Adsorbers

- Integral 3/8 or 1/2 ports (BSPP & NPT)
- Removes liquid aerosols and sub micron particles
- Oil free air for critical applications, such as air gauging, pneumatic instrumentation and control
- 0.01µm element as standard (coalescer)
- Differential Pressure Indicator (DPI) as standard on Coalescing Filters
- One hand operation for easy element cartridge removal
- Positive bayonet latch to ensure correct & safe fitting
- No tools required for servicing
- Adsorbing activated carbon element removes oil vapours and most hydrocarbons

Note: To optimise the life of coalescing element, it is advisable to install a P3KFA pre-filter with a 5 micron element upstream of the coalescing filter.

Options:

Port size	Description	Order Code	Flow l/s *	Max bar	Min temp °C	Max temp °C	Bowl size cm ³	Height mm	Width mm	Depth mm	Weight g

* flow with 6,3 bar inlet pressure and 0,2 pressure drop.

Technical Information

Fluid:	Compressed air	
Maximum inlet pressure*:	17 bar	
Temperature range*:	Coalescing filter : -20°C to +66°C Adsorber filter : -20°C to +50°C	
Media specifications:		
Coalescing efficiency	(0.3 to 0.6 micron particles): 99.97%	
Max. oil carryover (PPM w/w):	0.008	
Typical flow with 0.01 micron element at 6,3 bar inlet pressure and 0.2 bar pressure drop:	Coalescer	16 l/s
	Adsorber	28 l/s
Manual drain:	twist grip open and barbed connection	
Semi-auto drain: 0,2 bar @ min flow of 0,4 l/s bowl pressure to close drain	with barbed connection	
Auto drain: bowl pressure to close drain Operating range manual override facility (depress pin) barbed connection.	1 bar	
	1 to 17 bar	
Bowl sump capacity:	48 cm ³	

* Air supply must be dry enough to avoid ice formation at temperatures below +2°C

Maximum inlet pressure*:	17 bar
Temperature range*:	-20°C to +80°C
Typical flow with 10 bar inlet pressure, 6.3 bar set pressure and 1 bar pressure drop:	129 l/s
Gauge port (x 2):	1/4"

* Air supply must be dry enough to avoid ice formation at temperatures below +2°C

Material Specification

Body:	Aluminium
Bonnet:	Glass filled polyamide
Regulator cover:	Polyester
Control Knob:	Polyamide
Valve:	Composite
Elastomers:	Nitrile NBR
Screws:	Steel / zinc plated

Dimensions (mm)

Service kits

Description	Order code
Angle bracket + metal lock ring	P3MKA00MS
Panel mounting nut (aluminium)	P3MKA00MM
Lockable tamper-proof kit	P3MKA00AL
Tamper-proof knob kit	P3MKA00AT
Diaphragm kit (relieving type)	P3MKA00RR
Diaphragm kit (non-relieving type)	P3MKA00RN

Lockable Tamperproof Kit

This facilitates the tamperproofing of the Reglator and Filter-Regulator units. The hinged black part clamps over the control knob and is locked in place by sliding over the yellow cover. Four pad lock location holes are provided for added security if required.

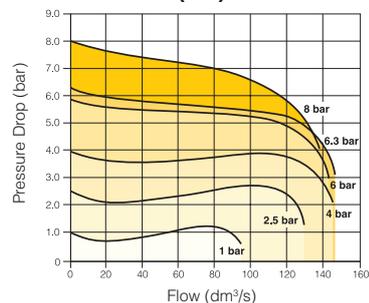

Order code

P3MKA00AL

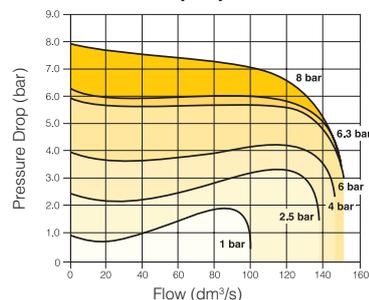

Note: Pad lock not included
