More Than Just Pressure Gauges and Thermometers

Winters valves allow for the isolation of process instrumentation facilitating quick replacement without shutting down the process. These valves are available in carbon steel or stainless steel (NACE or non-NACE) for high pressure applications (up to 10,000 psi), brass or lead free brass for low pressure (up to 400 psi) applications.

NVA Needle Valve (Straight Body, Hard Seat)

The one-piece body construction provides strength and safety while the slow opening handle prevents sudden pressure surge. The hard seat provides durability against high flow/velocity and corrosive media.

Body	Carbon steel, carbon steel NACE tip, stainless steel or stainless steel NACE
Connections	1/4", 3/8", 1/2", 3/4" or 1" NPTM x NPTF or NPTF x NPTF
Pressure	6,000 psi (41,368 kPa) or 10,000 psi (68,947 kPa)
Needle/Needle Tip	Stainless steel or stainless steel NACE
Gland Packing	Teflon [®] /Graphite (Graphite used for high temperature applications)
Warranty	1 vear

NVA Needle Valve (Angle Body, Hard Seat)

The one-piece body construction provides strength and safety while the slow opening handle prevents sudden pressure surge. The hard seat provides durability against high flow/velocity and corrosive media.
